

Flight Light Kit™

The Flight light kit is perfectly suited to the Hunter Flight ceiling fans, (and the Hunter Cabo Frio ceiling fans when installed indoors). The frosted opal bowl provides an even light distribution, and is supplied with a white finial. Suitable for 2 x E27 base energy efficient compact fluorescent light globes, or energy saving halogen globe options. *(Globes not included)*

24145: Flight Light Kit with White finial

Flight Light Kit™

When fitted to either a Hunter Flight or Hunter Cabo Frio ceiling fan, this light kit will add 110mm to the overall dimensions.

The Hunter Flight Light Kit can be connected easily to a Hunter ceiling fan, as the light has a plug connector which simply clips into the connector on the ceiling fan. This enables the light to be a DIY installation, if the fan is already installed.

Note: this light kit is not IP rated, so when fitted to a Hunter Cabo Frio ceiling fan, it must be indoors.
